

Practices That Work!

Reason for starting the innovative practice

To address the problem of undeclared buildings and changes in ownership of real properties resulting to low collection of real property taxes in the Municipality of Solano, Nueva Vizcaya, specifically in the Barangay of Poblacion North.

Role of Implementing Organization

1. Generation of data for the use during the survey such as: identified and assessed undeclared building, and addresses of absentee property owners
2. Capacitation of Barangay Officials in conducting socio-economic survey

How it works

Thru the Barangay Officials of Poblacion North and with assistance of Purok Leaders and Sangguniang Kabataan Members, a socio-economic survey was conducted identifying commercial establishment, property owners, and undocumented property improvement.

Details of benefits and results

The information generated was used to update the records of the Offices of Treasurer and Assessor which eventually helped increase the tax collection in the municipality.
